

Web Developer

Berlin, Germany

Libratone was founded on a big idea – to free sound. We are now on the verge of transforming our business to become more digital focused across our whole organisation. For this journey, we are looking for some of the best, most passionate and dedicated colleagues to join us.

Our headquarter is located in Copenhagen, Denmark and we have colleagues in many parts of the world incl. the UK, the Netherlands, US, China, Japan and Germany.

Libratone has rebuilt its website – including web hosting, new global CMS, frontend UX/UI and back-end code – last year. We are now looking for an outstanding **Web Developer** to in-house our ongoing website development to scale up Libratone’s website efforts.

We expect:

- Proven working experience in both Front-end and Back-end development
- Proven working experience as a .NET developer and web developer
- Proven working experience as Server Administrator, especially Azure-based cloud infrastructure
- Proven working experience in database development, especially Microsoft Azure
- Expert level knowledge and experience with current web markup and scripting languages such as: HTML, HTML5, CSS/CSS3, JavaScript/JQuery
- Experience owning and working with CMS systems - specifically Umbraco
- Experience in Modular web design
- Experience in working with third party APIs and tooling such as Google Analytics, Zendesk, Microsoft NAV, Shopify, Google Tag Manager, Facebook Pixels, Agillic, IpStack, Github, Cloudflare, New Relic, and others
- Experience in working on global (multi-language) websites
- Strong understanding and working practice of UI / UX for and cross-browser compatibility
- Strong understanding of security best practices including GDPR
- Understanding of ecommerce including payment gateways, online stores, cross channel orders /inventory management
- Ability for multi-tasking, working to emerging & tight timelines
- Strong communication skills and the ability to work as part of a team
- Fluent in English and German a plus

Main Tasks and Responsibilities:

- Write well designed, testable, efficient .NET code by using best software development practices
- Website maintenance as well as expanding our web offering
- Webshop: Implementation of Ucommerce .NET based e-commerce platform for Umbraco
- Design and develop new modules for Umbraco ASP .NET CMS Build HTML email templates
- Create website layout/user interface by using standard HTML/CSS practices
- Integrate data from various back-end services and databases
- Maintain and update Umbraco CMS
- Gather and refine specifications and requirements based on technical needs
- Create and maintain software documentation
- Stay up-to-date of emerging technologies/industry trends and apply them where applicable
- Support in developing HTML media assets

As Web Developer you will be based in our Berlin office and report to the Digital Director and dotted-line to the Global Website Manager.
