

Libratone TRACK+ Available Now

London, June 25th 2018: Announced at CES in January 2018, the new Libratone TRACK+ is now available. These lightweight wireless earphones include adjustable noise cancellation and are available in Stormy Black and Cloudy White. Priced at £169, the headset is available from Selfridges, Dixons Travel and online at Amazon.

Libratone TRACK+ combines the freedom of great sound with innovative four-step adjustable noise cancelling that tunes out the background, and CityMix® Smart, which automatically adapts to your surroundings.

TRACK+ earbuds are ergonomically designed, and splash proof (IPx4) making them the perfect match for people with an active lifestyle.

With the new headset, music lovers are well equipped to listen to their favourite tunes when commuting, training, travelling and working, without surrounding noise spoiling their experience. TRACK+ is also designed to fit easily into a small pocket when not in use and snugly in the ear when on the go, perfect for those who want their earphones lightweight and wireless.
